

Where do you get the information and knowledge you need to effectively manage and control your ISDN-PRI services?

Think about the benefits of having Real-Time access to ISDN-PRI traffic information collected from your Network and any PBX, IP-PBX, server or other device connected to your Network.

PRILINK II PROVIDES

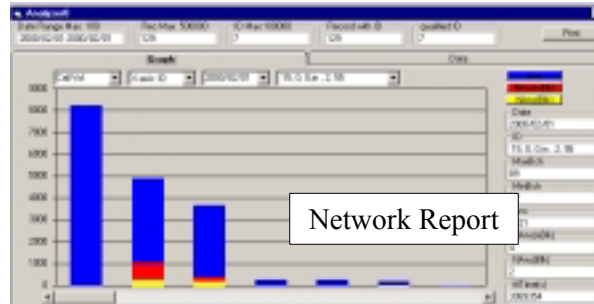

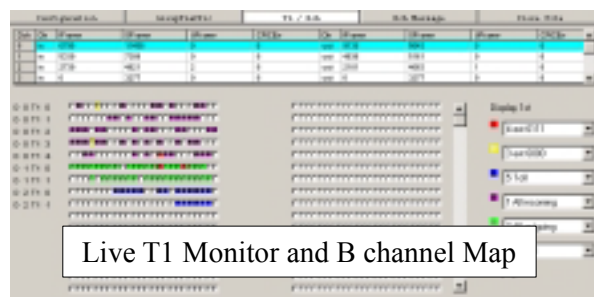

LIVE AND HISTORICAL TRAFFIC REPORTS THAT ENABLE YOU TO MANAGE AND CONTROL YOUR ISDN-PRI SERVICES WITH TOTAL PRECISION

REAL-TIME ALARMS ALERT YOU TO TRAFFIC OR CIRCUIT CONDITIONS THAT CAN IMPACT YOUR SYSTEM AND ABILITY TO PROVIDE SERVICE TO YOUR CLIENTS

INFORMATION TO DIAGNOSE NETWORK PROBLEMS AND ALLOW MONITORING OF EVENTS AS THEY UNFOLD

COMPREHENSIVE CALL DETAIL THAT PROVIDES AUDIT TRAILS ON ALL CALLS WHETHER THEY ARE ANSWERED, ABANDONED OR BLOCKED

CONFIDENT ASSURANCE OF SERVICE QUALITY OFFERED TO KEY BUSINESS UNITS

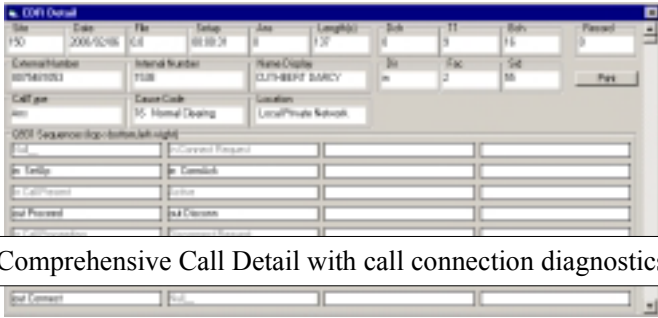

Never wait for traffic studies again!

All data derived from Live Traffic information is stored for up to 400 days and can be retrieved from a variety of **valuable reports**.

CONSIDER THE ADVANTAGES OF THE PRILINK II TRAFFIC MONITOR

PRILINK II compiles traffic data on all call attempts regardless of completion. PRILINK II is positioned between the Public/Private Network and the PBX and takes all information from both perspectives. This gives PRILINK II the unique ability to objectively capture calls before, during and after setup as well as maintain surveillance during connection and then follow the disconnect request from either the PBX or Network side. PRILINK II is compatible with any ISDN-PRI service to be found in North America regardless of Network or Equipment provider.

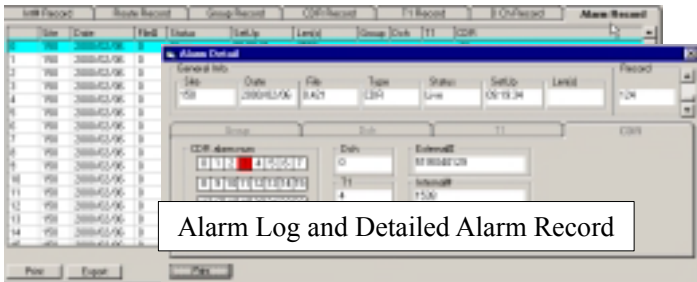

Comprehensive Call Detail with call connection diagnostics.

Complete information on every call on your ISDN-PRI services. React to personnel or service issues as they occur. Detailed connection records include: ring cycles, call duration, B channel and T1 used, who hung up on who (Network, Remote User or PBX) CLID blocked by whom, call disconnect reason, PBX route, Network Facility, etc.

ALARMS

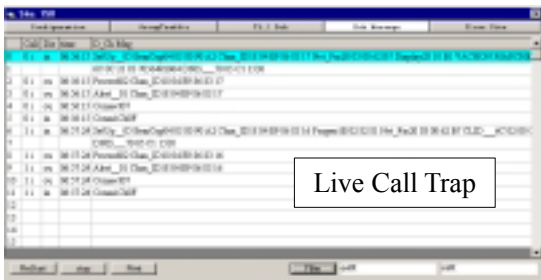

Be alerted immediately. Uncover problems or potential problems in Real-Time. Provide proof of intermittent or difficult to validate service issues to your suppliers.

Alarm Log and Detailed Alarm Record

FILTERS

A variety of Filters enable quick searches and retrieval of specific information without the need to review irrelevant data.

Live Call Trap

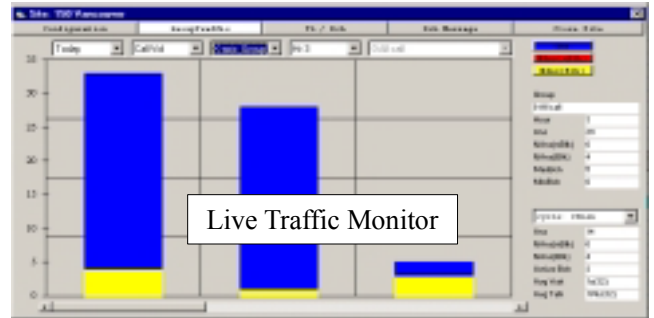

EXPERT Support

PRILINK is a privately owned technology development company which has dedicated the past decade to designing, engineering and refining valuable and objective Telecom management tools. Our experienced support staff and developers are ready and able to assist you with any ISDN-PRI diagnostic, design or reporting concerns.

Save Time Real-Time Diagnostic Reports allow you to quickly pinpoint and solve difficult service problems. Issues that took days or weeks to resolve can now be diagnosed in minutes. No more "no-trouble-found" excuses.

Optimize your Network Understand your access requirements with precision. Use information that has never been available to Telecom managers before. Stop providing access services and facilities that are not required.

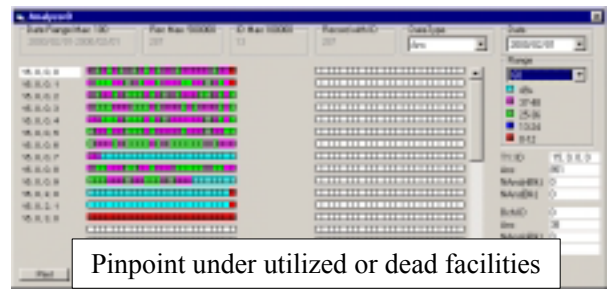

Protect your Interests Application specific alarms proactively alert you to conditions you need to be aware of to protect your business. Sudden changes in Traffic volumes will trigger alarms. Security threats and undesirable telecom behaviors can be monitored and detected in Real-Time. D channel alarms and T1 alarms will alert you to Network failures and potential Network failures.

Live Traffic Monitor

ANALYZER

Report Analyzer takes vast amounts of data and quickly converts it to meaningful and concise snapshots of key indicators. Below is one of many reports that can be selected and used to resolve a variety of service concerns.

Pinpoint under utilized or dead facilities
